## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/04/09 has been entered.

### ***Specification***

2. Applicant's response has overcome the objection to the specification.

### ***Claim Objections***

3. Applicant's response has overcome the objection to claims 26, 30-36, and 38-45. However, after further consideration, claims 43 and 45 are objected to as set forth below.

4. Claims 43 and 45 are objected to because of the following informalities: claim 43, line 3, "at the one" appears to be incomplete. Was "time" intended?

As per claim 44, the limitation recited in claim 45 appears to be directed to an apparatus rather than a method. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

5. Applicant's response has overcome the rejection of claims 26, 28-36 and 38-45.

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 36 and 40-42 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent<sup>1</sup> and recent Federal Circuit decisions<sup>2</sup> indicate that a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim recites a series of steps or acts to be performed, the claim neither transforms underlying subject matter nor is positively tied to another statutory category that accomplishes the claimed method steps, and therefore does not qualify as a statutory process. For example the method including steps of receiving, producing is of sufficient breadth that it would be reasonably interpreted as a series of steps completely performed mentally, verbally or without a machine. The claim fails to recite any corresponding hardware in combination with the method step(s) to effectively tie the process claim with a statutory class of invention, i.e. particular apparatus.

***Allowable Subject Matter***

8. Claims 26, 30-35 are allowed.

<sup>2</sup> *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

9. Claims 43-45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
